

# Blue Globe Spruce

*Picea pungens 'Globosa'*

This little beauty is like a shining sapphire in gardens of hardy green dwarf shrubs. Use it a single accent in Asian schemes or for contrast in gardens heavy in cool colors. Adds brightness to dark parts of the yard and makes a nice low hedge against an emerald lawn. However, its real value is as a simple specimen.

<b>Key feature:</b>	Deer Resistant
<b>Plant type:</b>	Conifer
<b>Deciduous/evergreen:</b>	Evergreen
<b>Cold hardiness zones:</b>	2 - 8
<b>Light needs:</b>	Partial to full sun
<b>Sunset climate zones:</b>	1 - 10, 14 - 17
<b>Water Needs:</b>	Needs regular watering - weekly, or more often in extreme heat.
<b>Average landscape size:</b>	3 to 5 ft. tall, 5 to 6 ft. wide.
<b>Growth rate:</b>	Slow
<b>Growth habit:</b>	Round
<b>Special features:</b>	Attracts Birds, Deer Resistant, Dwarf Plant, Easy Care, North American Native
<b>Landscape uses:</b>	Container, Specimen, Topiary
<b>Blooms:</b>	Does not flower
<b>Foliage color:</b>	Silver-blue

## Care Information

Globe-shaped evergreen shrub is dwarf, flat-topped and densely branched. Bright blue needles hold their color all year but are brighter in summer. A unique accent for that special spot. Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. Feed with a general purpose fertilizer before new growth begins in spring.
